

[Why ML important for AI]

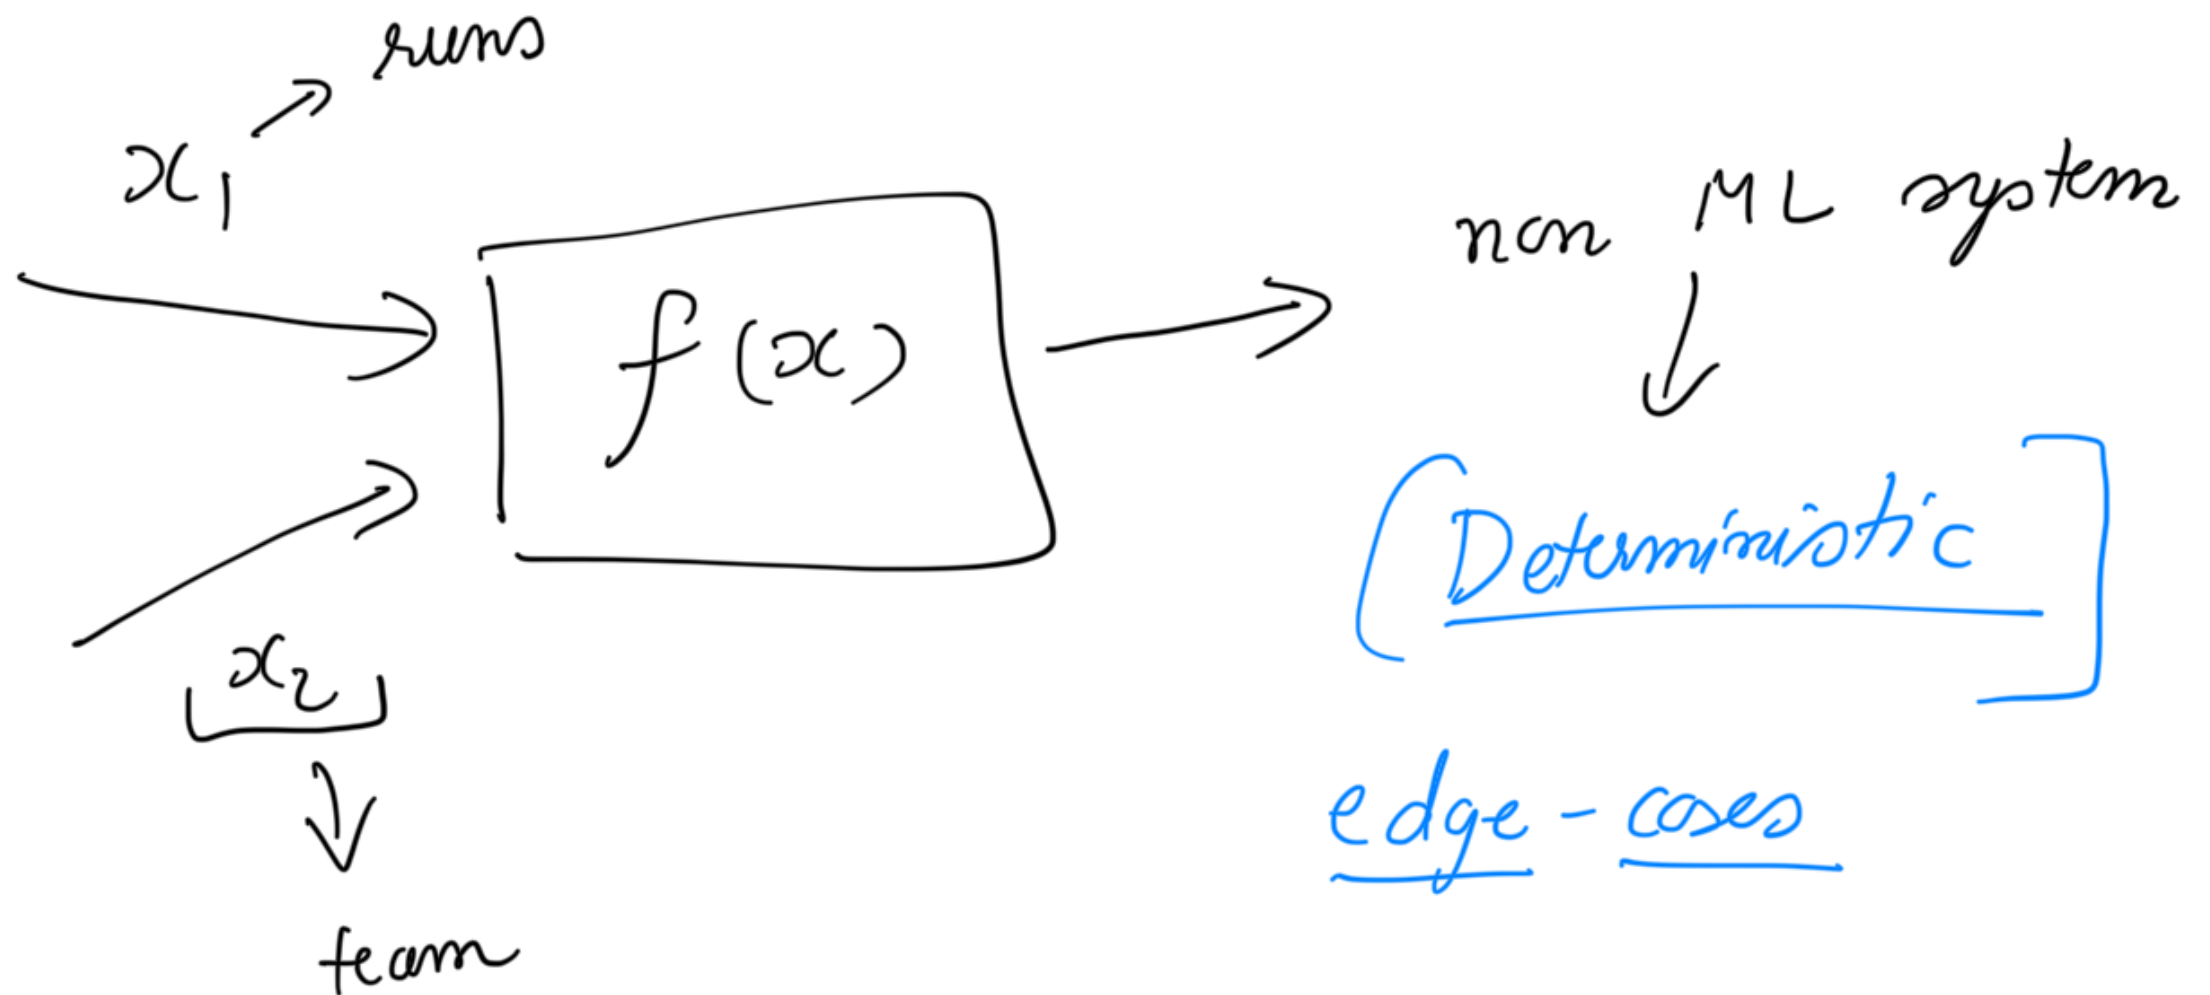

Q How do we evaluate ML models ??

F1 score,

ROC-AUC .

① calculate avg runs of a cricketer against a given team

how calculate

chances of getting heart-attach

ML (probabilistic)

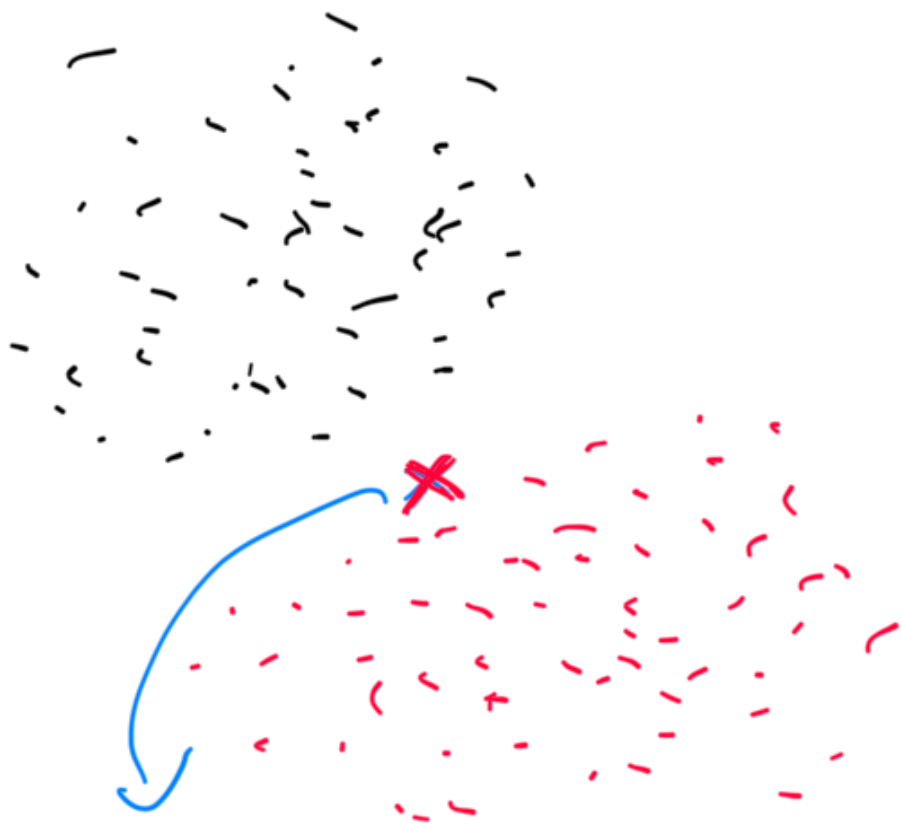

yes

no.

pass	
fail	

KNN : K nearest neighbours

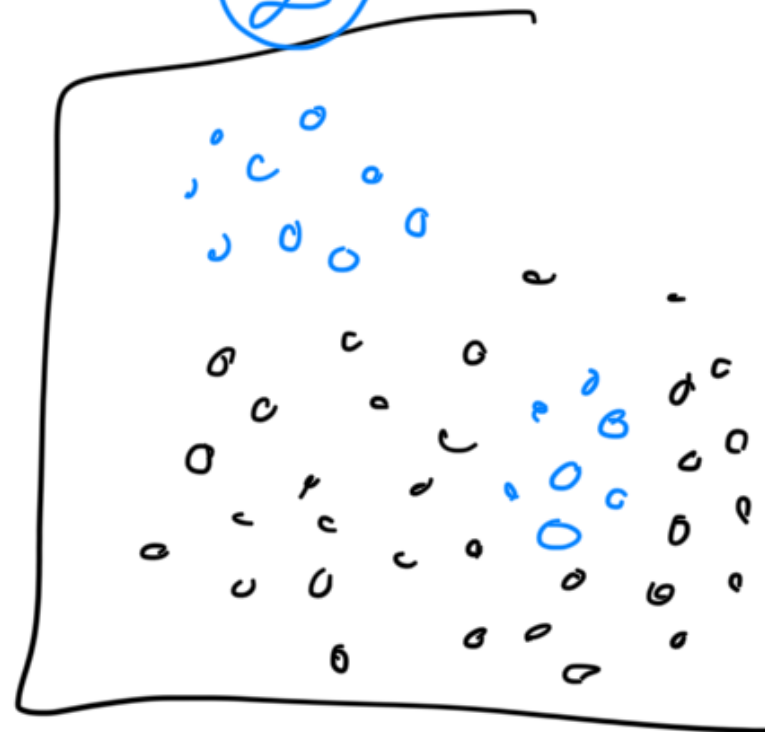

①

7 3
↓

$k = 10$

②

$x \rightarrow$ red class

$k = 10$

KNN properties

$\rightarrow$ distance based algo.]

$\rightarrow k \rightarrow$ hyper-parameters

$\rightarrow$ no training phase

feature - pre-processing?

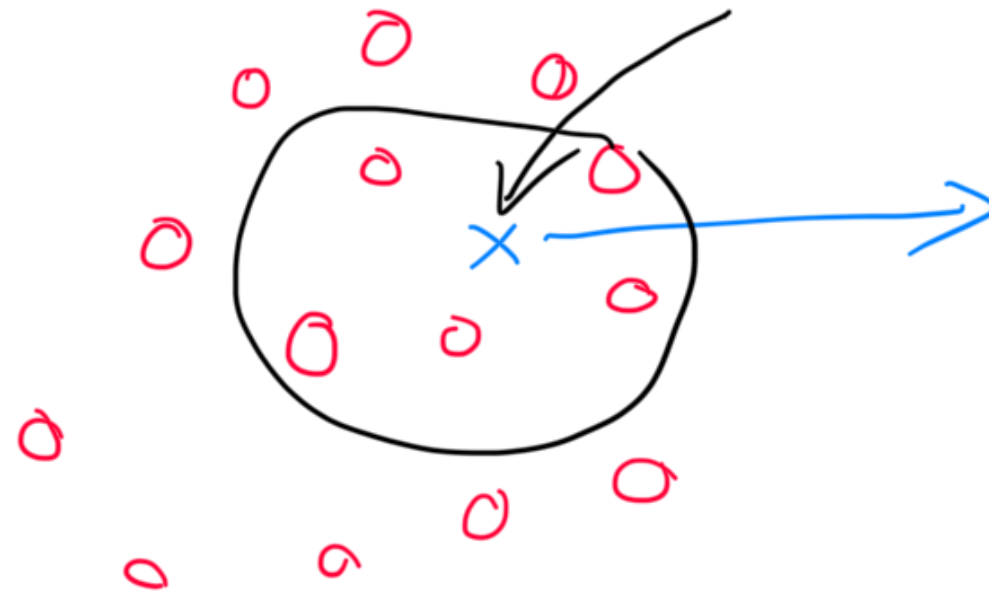

nearest

closest distance

$\approx$

similarity

$KNN \rightarrow \underline{ANN}$
↓
approx nearest
neighbours.

ANN $\rightarrow$ text search
 $\rightarrow$ recommendation systems
